Objective

A systems analyst consultant to organizations seeking an extraordinary record of streamlining processes, exceeding operational goals and executing very effective implementations of a wide array of technologies with a distinct emphasis on World Wide Web integration into daily activities and procedures, specializing in ministry and small business applications.

Experience Samples

Author: *MODx Revolution: Building The Web Your Way*

An in-depth reference and application user guide for one of world's foremost Content Management Frameworks available, including the integration of multiple technologies including: AJAX, JSON, HTML5 and CSS3.

Technical Analyst, Computer, and Internet: G.W. Schultz Tool

2004-2008, Tavares, FL

Effectively analyzed and resolved multiple issues responsible for a reduction in product delivery. These changes directly resulted in a 300% productivity increase. I also created multiple web applications for the inventory.

Web Site Migration: World Wide Stationery Mfg. Co., Ltd.

2000-2008, Dongguan City, China

Instrumental in the development and implementation of 3ringmetals.com for the purpose of brand recognition and domination of the worlds largest manufacturer of ring metals. I had the pleasure of working with the famous racing legend, Russ Truelove, for the duration of this project and we achieved millions of hits and achieved mastery of placement of company in all major search engines.

Computer, Network, and Audio: Living Faith World Ministries

2000-2010, Daytona Beach, FL

Established computer networks, security, and domain controls for all computers utilized in the facility in matching with the vision statement and planned goals for organizational growth. We repeated this process when new facilities were purchased at another location

Technology Supervisor: River Crest Church

1999-Present, Daytona Beach, FL

Oversee, train, plan, implement, and execute all aspects of technology in eight different departments. As a systems analyst, I am instrumental in establishing new frameworks and structures within the church, as well as simplify and maximize daily activities using internet and other computer technologies. Directly credited for achieving an internet audience reaching over 70 nations
